Face shield
user instructions

A. Purpose of the shield:
This face shield is made only for COVID-19 protection. It is not a general-purpose device and should not be used for purposes other than protection against COVID-19. It protects the wearer against large droplets emitted immediately after a cough by a person nearby and facing the screen but does not protect against suspended particles. This visor complements the adequate respiratory tract protections.

B. List of parts:
1. 1 face shield support (made of PP plastic)
2. 1 elastic tape (strip)
3. 1 transparent sheet (made of PET plastic)
4. 1 Buckle to adjust the elastic tape around the head (made of PP plastic)
C. Assembly:

I. Mount the strip (2) on the support (1):
   Pass the strip through the slots of the support as shown in the picture:
   1) Choose one side of the support
   2) Start from the 1st slot from the inside
   3) Pass through the 2nd slot
   4) Pass through the 4th slot
   5) Pass through the 5th slot
   6) Repeat the same sequence on the other side starting from the 5th slot

II. Mount the buckle on the strip
   Assembly the buckle on the two strip ends as shown in the picture.
   Using the buckle, adjust the elastic tape length around your head.
III. Assembly the transparent sheet on the support

Connect the transparent layer to the support using the four fastening elements. Be careful during this operation in order not to damage the support.

---

D. Options Removable horizontal shield

The horizontal part of the support is connected via three fixation points to the arch supporting the transparent layer. In case of need the horizontal part can be removed by cutting the connecting points.

E. Use - Maintenance – recyclable parts

Use this face shield only as PPE (Personal Protection Equipment) against splashes, sprays, and spatter of body fluids in the specific context of COVID-19.

Flammable material: keep the face shield away from any flame or source of heat.

This PPE is intended for personal use and should not be shared between different users. In case of unavoidable shared use, the face-shield must be properly disinfected prior to its handover to another user.

This face shields must be used in accordance with applicable regulations and best practices regarding the use of PPE.

COVID-19 related hygienic measures must also be followed.

In case of damages to the visor, head support or elastic band (e.g. cracks, bends, etc.), the face shield shall be replaced.

In case of scratches or other defects enabling a clear vision, the visor, shall be replaced.

Daily washing with water and soap is recommended.

The transparent shield is made of PET recyclable material.
