SAFETY REGULATION SR-S

SMOKING AT CERN
1 INTRODUCTION

1.1 Legal basis
This Safety Regulation forms part of the CERN Safety rules and is issued in application of the “Staff Rules and Regulations” and of the document “Safety Policy at CERN” (SAPOCO 42).

1.2 Purpose and scope
The purpose of this Safety Regulation is to define the obligations concerning smoking at CERN.
The prescriptions enforced by this Safety Regulation shall apply to all persons under the authority of the CERN Director General.

2 OBLIGATIONS
Smoking is forbidden in all enclosed or covered spaces\(^1\) on CERN premises as well as inside all CERN vehicles.

3 RESPONSABILITIES
The Department shall:

- ensure the application of the CERN rules concerning smoking;
- ensure that ashtrays are available at the entrances of the buildings so that smokers can extinguish their cigarettes before entering the premises.

4 DISCIPLINE
The Director General may take disciplinary action against members of the personnel who, whether intentionally or through carelessness, are guilty of a breach of this Regulation.

5 FINAL PROVISIONS

5.1 Expiry of existing documents
This Safety Regulation, together with the relevant General Safety Instructions, if any, replaces Safety Instruction IS 46 as from the date of publication.

5.2 Entry into force
This Safety Regulation enters into force upon publication on the CERN Web Site dedicated to the Safety rules: [https://www.cern.ch/safety-rules/](https://www.cern.ch/safety-rules/).

\(^1\) List not exhaustive: building, workshops, halls, conference rooms, offices, restaurants, underground premises, etc.
